Subject: FW: Bremerton Gasworks Beach access for Removal Assessment
[image002.gif](#)
[DNR Consent 2012.pdf](#)

Kristin,

Kathy called me today and asked if I could confirm that this Consent for Access for Bremerton site is still active and valid. They are still in the initial action stage (see comments below) so I do not see why it would not be but do please confirm.

Once this initial work is done a full RI/FS will begin with more extensive sampling planned for later this summer. There was a question of whether EPA would need a new CFA agreement for this work. After reviewing CFA I believe these efforts are covered as well but again wanted to confirm with you. Please let me know if you agree or if you see a need for new agreement as they enter the RI/FS stage of work. Also please let me know how you would like to include District in these discussions.

Thanks,
Shayne

Subject: Bremerton Gasworks Beach access for Removal Assessment

Shayne,

As I mentioned to you on the phone today, Cascade Natural Gas and EPA have entered into an Administrative Order on Consent to, among other things, perform a removal assessment and possibly a Time-Critical Removal Action, if one is necessary, on the beach north of the old Bremerton Gasworks. The last consent for access EPA received from DNR for this specific work is attached, signed by Kristin Swenddal on 8/8/2012. It looks to me like it is still valid to provide permission for EPA, Cascade, and their contractors to access the beach for sampling this summer. Please let me know if DNR does not agree to continue to allow access or contact me to discuss any concerns you might have.

Thanks for your continued cooperation. We are looking forward to finally continuing this work.

Kathy Parker
